

MILK PREGNANCY TESTING Fact Sheet

Benefits of Milk Pregnancy Testing

We can pregnancy test your herd using the same sample as your herd test.

Allowing your pregnancy testing to be
Convenient, Flexible & Efficient

Milk Pregnancy Testing with HICO provides

- 28 days post breeding and 60 days post calving testing
- Detects pregnancy associated Glycoproteins to determine pregnancy status in milk
- 98% accuracy as rated by IDEXX
- Assists with calving intervals and finding empty cows efficiently
- Reduces animal handling and stress than other pregnancy methods
- ID Integrity

"We use Milk Pregnancy Testing regularly now. It allows us to undertake more accurate drying off decisions which has benefited us financially. The cows that aren't paying their way in the vat can be removed from the herd confidently without having to have the vet out. The workload with milk pregnancy testing is a lot less than traditional pregnancy testing methods we have used previously."

Shaughan & Helen Fox, Modella.
